<b>Office Action Summary</b>	<b>Application No.</b> 10/585,344	<b>Applicant(s)</b> NAKAMURA ET AL.	
	<b>Examiner</b> DEVANG PATEL	<b>Art Unit</b> 1793	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

**Group I: claim(s) 7-10**, drawn to a reflow furnace comprising a heater including a perforated plate having discharge holes.

**Group II: claim(s) 11-14**, drawn to a heater comprising an electric heater, partitions dividing into a suction chamber and discharge chambers, wherein each discharge chamber has a perforated plate having discharge holes.

A heater including a perforated plate having discharge holes is a common technical feature of Inventions I and II above. However, Kimihito et al. (JP 2000-022325, provided by Applicant) discloses a heater (17) having a perforated plate (22) having discharge holes (31) blowing hot air (12) (abstract, fig. 1) and so it is not Applicant's contribution over prior art. Thus, the common feature is not a special technical feature and claims 7-14 fail to form a single general inventive concept. Therefore, unity of invention is lacking and restriction is proper.

A telephone call was made to Michael Tobias on 4/13/10 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include **(i) an election of an invention to be examined and (ii) identification of the claims encompassing the elected invention.**

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.
